Accessibility

Retail Furniture Ltd aims to make our website accessible and usable by people of all abilities and disabilities, including those with visual, hearing, cognitive or motor impairments.

Many people use assistive technologies to allow them to adjust their experience of a website to make it easier for them to use. For example, they might view a website in easier-to-read colours with larger fonts, they may choose to experience content as spoken text, or they may navigate around a site using the keyboard only.

As these assistive technologies become more available and sophisticated, we want to ensure that our website continues to work well with them to deliver a good experience for all our users. We are actively working to increase the accessibility and usability of our website and in doing so we adhere to many of the available standards and guidelines.

If you have any questions regarding the accessibility or usability of our website, please contact us through the contact page.
