## Cookie Policy

Certain parts of the website use “cookies” to keep track of your visit and to help you navigate between sections. A cookie is a small data file that may be stored on your computer's hard drive when you visit a website. Cookies can contain information such as your user ID and the pages you have visited.

We use cookies on the website to enable us to deliver content that is specific to your interests and to give us an idea of which parts of the website you are visiting and to recognise you when you return. Our cookies do not read data from your computer's hard drive or read cookies created by other websites that you have visited. This means that your visit will be tracked, but that to all intents and purposes remains anonymous.

There are four types of cookies used on this website:

### Session Cookies

These are temporary cookies that remain until your browser is closed. They are used by our web application in order to maintain the information relating to your transaction from page to page following any input, such as when a form is completed over several screens.

### Web Analytic Cookies

These cookies are used to help us compile anonymous statistics in order to improve and manage our sites. An example of the information collected would be the path you used to gain access to the site and your patterns of browsing when navigating the site.

### Information Cookies

These cookies allow the site to remember how you have answered a question in order to change the content displayed to you. For example, if you have already taken a survey this cookie will ensure you are not asked again.

### Membership Cookies

These cookies are used to provide you with access to membership services you have subscribed to. They are “persistent” meaning they are not deleted when the browser is closed, and expire after a period of 2 months. You can still use most of this site with cookies turned off. To stop cookies being placed on your terminal equipment refers to your specific internet browser. In a few cases blocking cookies may reduce the functionality of some sites or prevent access to them depending on your chosen browser options. Cookies can also easily be deleted through your specific internet browser, although this means your settings will not be retained.

You may refuse to accept cookies by activating the setting on your browser which allows you to refuse the setting of cookies. However, if you select this setting, you may be unable to access certain parts of the website. Unless you have adjusted your browser settings so that it will refuse cookies, our system will issue cookies when you access our website.
